

## partnering for even smarter POS and payment

Let customers pay their way: put Clover Flex and TevX to work for your business

- Tevalis EPOS Point of Sale is an award-winning intuitive system developed in partnership with the hospitality industry. Its features, functionality, integrations and ease of use mean Tevalis EPOS and TevX handheld tech always meet the ever-changing needs of hospitality, leisure and gaming.
- Clover Flex is an increasingly popular POS terminal and business management solution: with more than one million devices in the field, Clover is increasingly chosen for its power and flexibility.
- Integrating these leading systems gives owners and operators even more choice, flexibility and efficiency in serving guests, making ordering and payment even smarter and more customer-focused: eliminate queues, improve accuracy and close tables faster.

*Kevin Dixon, Director of Partnerships, Tevalis*

“As a trusted Hospitality solutions provider, we understand innovation is key. By understanding the ever-changing requirements of our operators as well as shifts in consumer behaviour, Tevalis and Clover have worked together to launch an amazing solution which is focused on providing efficiencies for front of house, as well as giving operators the tools to provide a fantastic guest experience. By having our TevX solution implemented on Clovers robust Flex device, front of house teams can digitally take orders as well as payments without the need to carry multiple devices”

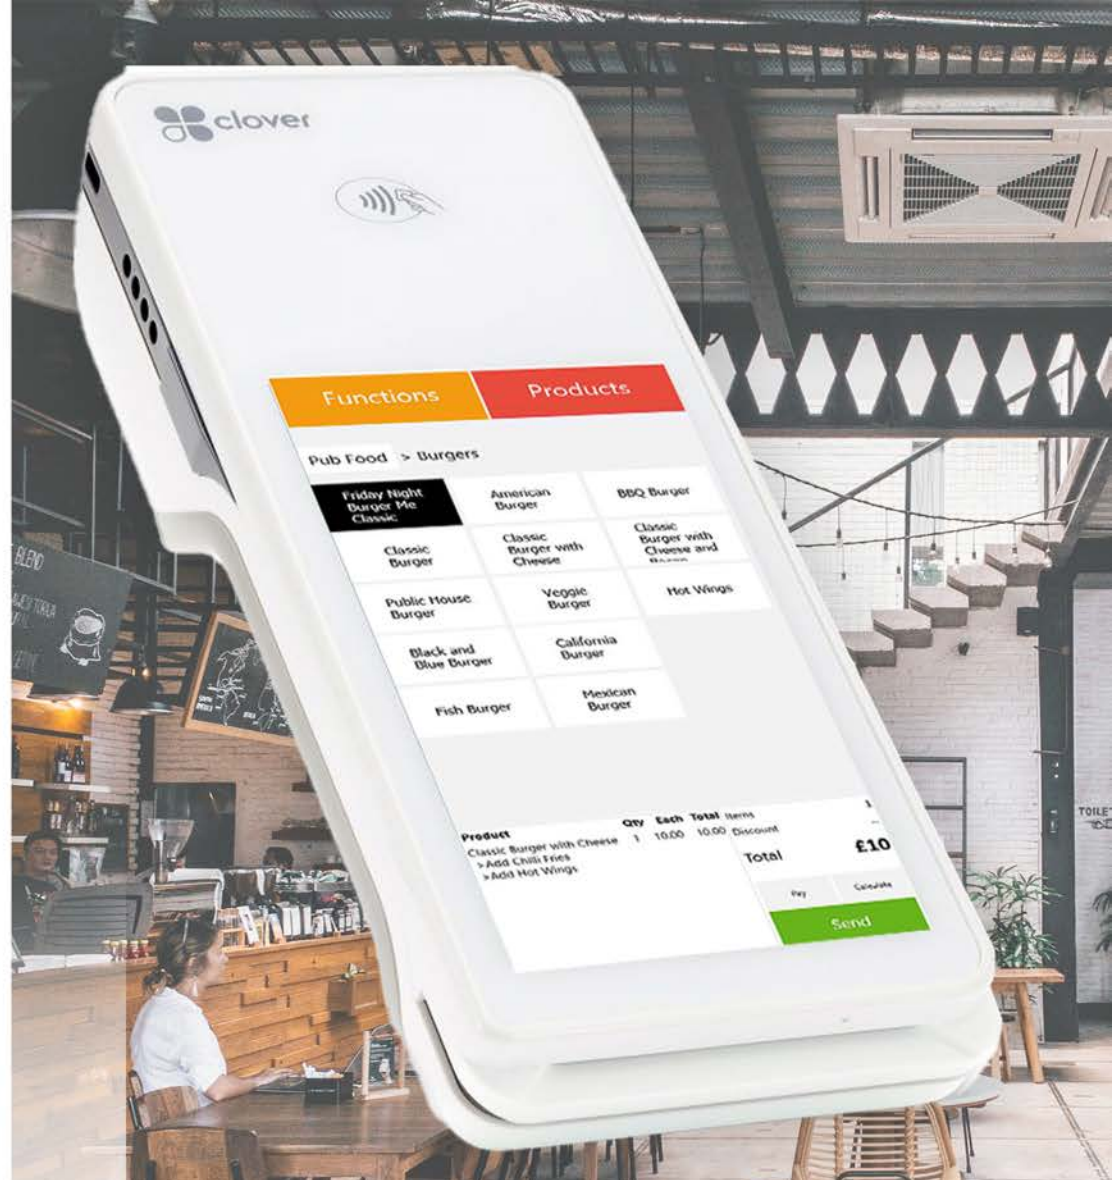

# Order & Payment

Helping you achieve maximum efficiency and profitability, especially during busy periods and peak hours of service, this fully featured Clover Flex/TevX handheld Order & Payment solution puts reliability, resilience and productivity into the palm of your hand.

## Clover Flex and TevX

Helping you be more nimble and adaptable, Clover Flex solutions make it easier to connect with customers through an all-in-one handheld POS to take payments, track sales and conduct business in smarter ways. The Tevalis handheld ordering solution TevX uses cross-platform technology, duplicating all the POS functionality you want for familiarity and easy navigation combined with all the reliability and stability you need from a handheld. You also have peace of mind: Restful Service technology means you can process orders offline with no database connection required to the master terminal, storing this locally and sending when reconnected to the network.

- Easy set up on industry-leading Clover devices
- Higher levels of productivity
- Smoother payments
- Increased speed of service
- Improved customer satisfaction

The Old Vic

“The system integration from our TevX solution & Flex allows us to give a quick, effective and streamlined service”

# Pay at Counter

Tevalis EPOS technology fully integrates with Clover Mini, the sleek, compact point of sale terminal that enables businesses to accept multiple payment types, meaning customers can pay the way that suits them best.

- 7-inch HD screen: 1280 x 800 TVDPI display
- Easy for customers to dip, swipe, tap or enter PIN
- External power adapter with DC input
- Security certification: PCI PTS 5.0
- In-built receipt printer: print, email or send SMS receipts
- Unique features include 'PIN on glass', Wi-Fi and Ethernet connectivity
- Accepts all major payment types including Apple Pay, Google Pay, Samsung Pay
- Increases accuracy, reduces human errors and improves reconciliation

*Terry Roberts, Head of ISV  
Partnerships, Clover*

*“We know that Hospitality venues are always trying to find ways to create a true leisure experience beyond simply food & drink, as consumer demand is forever changing around speed of service with simplicity as a given. This is why we are so excited to be working with Tevalis to offer a fully integrated solution helping Restaurateurs take care of Ordering & Payment through a single device enabling their operational teams to offer a streamlined experience for their customers”*

## About Clover

A leader in the payments industry, Clover has been at the forefront of merchant payment solutions since 2012 as part of Fiserv. Following the merger of Fiserv and First Data, it has continued to create products and services that take payments beyond Point Of Sale and into the future. Clover is the leading PCI-compliant, EMV-ready solution in the marketplace, routinely passing thousands of tests to keep up with the latest payment features and standards. Clover integration is designed to take the sting out of supporting EMV by limiting communications between Clover and your point-of-sale, while Clover devices easily integrate with point-of-sale systems.

Every stylish Clover POS device not only makes taking payments easier but is also customisable to suit specific business needs.

## About Tevalis

The Tevalis Technology Ecosystem and approach is founded on continuous investment in research and innovation and working alongside hospitality clients and other industry professionals to meet changing market needs. The flexibility and scalability of Tevalis' industry-leading technology makes it ideal for hospitality businesses of all shapes and sizes, from single independent operators to multi-site chains and leading brands, in the UK and internationally.

Currently supporting on-premises systems and enterprise platforms for more than 2,000 sites and 8,000 client installations, Tevalis clients operate in key sectors including Restaurants, Food Halls, Pubs and Clubs, Quick Service and Kiosks, Hotels, Theatres and Cinemas, Private Members' Clubs, Hotels, Leisure Venues and Stadia & Arena.
