

One guest experience platform to power your success.

Putting you in control of your brand, your guest relationships, and your data.

Proven to increase profits and repeat business.

Say goodbye to data silos and say hello to increased profits and more regulars. The SevenRooms Guest Experience & Retention platform gives you total control and a complete, 360-degree view of your guests, across both on-premise and off-premise dining. The result? Better, more personalised experiences for every guest without the need for any additional staff or special expertise.

But most importantly, SevenRooms is seamlessly connected with Tevalis, meaning you can uncover critical insights about your guests and your business enabling smarter decisions and turning more guests into regulars.

Track spend in real time.

Personalise service and marketing.

Create robust guest profiles.

“The Tevalis and SevenRooms integration allows us to seamlessly see what’s going on. I can log into Tevalis and see who is booked for the night and I can log into SevenRooms and see what’s being ordered on that table at what time.”

Connect SevenRooms to your Tevalis EPOS.

Integrating Tevalis and SevenRooms means you can track spend in real-time, personalise service, create robust guest profiles and supercharge your marketing with ease! Saving you and your business time and money, streamlining your reservation process, as well as generating a strong guest database.

Hold deposits/pre-payments against the reservation table in the Tevalis EPOS, which will credit on the final bill.

Send back status updates to SevenRooms when the table closes, allowing the table to be reserved again by a new guest.

Move table requests which can be accepted or rejected based on the table availability.

Send basket level data back to SevenRooms which can be used for personalised promotional offers.

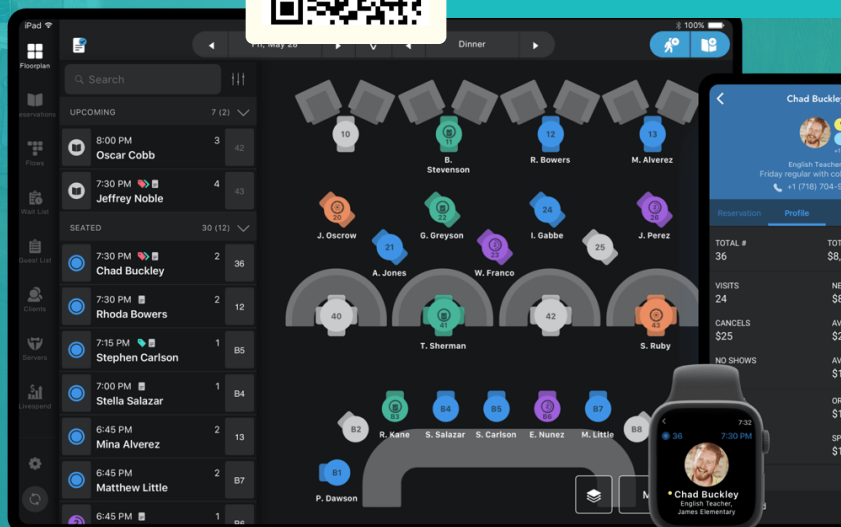

Bringing a true passion for hospitality, Paragon Group offers premium, responsibly sourced food to the locals and visitors of Staffordshire, Cheshire, and Shropshire. Contemporary and relaxed dining experiences can be enjoyed from each of the group's nine venues, which have been selected for their iconic landmark sites. With nine sites in the group and the continuing focus on outstanding customer service and fine dining experiences, Paragon needed a complete hospitality solution. It was also essential for the technology to be rolled out quickly and effectively. Tevalis and the teams at Paragon worked together to create the right ecosystem for the needs of the business, including bespoke developments and new integrations.

“We wanted one of the best reservation systems out there. We feel like SevenRooms is that. With it's link to Tevalis, we've maximised that straightaway from when the guest books their table, the server can already see information about the guest as soon as they are sat.”
