tevalis & dojo

Empowering operations

with an effective solution that gives you fast and secure payments.

Pay at Table

Dojo's flexible card payment device is built on industry-leading and innovative technology. Floor staff can take payments on the move quickly and effectively from a simple yet powerful handheld PDQ, close tables off directly from the device, split the bill, and so much more.

Accepts all major payment types including Apple Pay, Google Pay, and Samsung Pay.

Supports NFC payments for maximum customer efficiency.

Completely wireless allowing for flexible payments around the venue.

Increases accuracy, reduces human errors, and improves reconciliation.

Decrease queues and close tables faster.

Built-in receipt printer; print, email, or send SMS receipts.

Sync Your Transactions

Gone are the days of manual data entry onto your EPOS system: effortlessly integrated payments between Tevalis and Dojo mean all payment information is synced directly onto the POS for analysis.

Take Payments Faster

Process card transactions 80% faster than the industry average thanks to Dojo's intuitive Dojo Go device, giving staff the flexibility to take payments quickly. Shorter queues mean happier customers.

Gain Instant Insights

Easily view performance data through the Tevalis Enterprise module, Business Analytics, helping you make key decisions based on up-to-the-minute business performance data.

Get Paid, Tomorrow

Get your takings the very next day at no extra cost, even on weekends and bank holidays.

Connect your card machine to your Tevalis EPOS.

Discover integrated payments for faster transactions and fewer mistakes. Business is all about making the right connection, integrated payments are too. Dojo uses cloud-based software to seamlessly link your card machine to your Tevalis EPOS system, so it's goodbye miskeying mistakes and hello to smoother, faster transactions.

The transaction amounts are securely passed between both devices, meaning end-of-day reconciliations should always add up. So you can conquer queues, and save time at the end of the day.

Dojo Pocket
The Tevalis handheld ordering app, TevX, is installed on a portable terminal, allowing staff to take both orders and payments at the table from a single device.the transaction.

Pay at Table
Ideal for bustling restaurants, Pay at Table means printing and splitting the bill and adding gratuity can all be done on your card machine. So no more pacing back and forth from the table to the till.

Pay at Counter
The terminal is physically connected to the POS: when a transaction is tendered as card on the POS, it automatically flows to the card machine, reducing errors from manually entering the figure and speeding up the transaction.

Semi-Attended
Similar to Pay at Counter, but integrated for self-service kiosks.

tevalis & dojo & SOHAILA

Since 2010, homelessness in England has been rising. The problem we are tackling is common – those living in temporary accommodation find it increasingly challenging to save money for a deposit because a poorly designed system cuts their benefits as they start to work. Sohaila is a restaurant created by Fat Macy's, we are a restaurant and natural wine bar, serving contemporary Middle Eastern sharing plates alongside a curated selection of low-intervention wines. To support the team on their journey, they required a Point of Sale suite which could adapt to their requirements, the power to manage a high volume of orders with ease and a place to centrally manage every site and their system. The result was a connected Tevalis EPOS suite paired with intuitive management tools, Business Analytics, Stock Management, Centralised Management and Cash Management.

> " Implementing Dojo means that we can immediatley bring up people's bills whilst around the restaurant. It saves us time and allows faster table turns, which is really key. "
