

Build better rotas with real sales data.

Simplify employee scheduling, optimise labour costs across locations, and help managers make the right decisions in the moment.

Schedule, engage, and pay your staff in one system.

Whether it's simple time clock apps, instant communications or demand-driven staff schedules, Workforce.com is the home of labour efficiency and employee engagement.

With Workforce.com, revenue and shift data from previous weeks are used to accurately forecast upcoming demand. Build the best rota optimised for hourly rates, staff qualifications, and availability, ensuring that the right person is scheduled at the right time.

When frontline teams have the right software to make the best labour decisions, it's visible all the way up to the executive level. Workforce.com gives C-suite executives a bigger picture of operations, with real-time 'drill down' dashboards for metrics that matter most. On average operators can reduce their labour costs by 4-11%.

Analyse Demand

Capture fluctuating demand patterns associated with weekdays, seasonality, and economic trends.

AI Forecasting

Workforce.com's machine learning algorithm trains and aggregates multiple models to predict demand up to four weeks out.

Schedule in one click

Automatically build and populate a schedule based on your labour forecast with One-Click Scheduling.

Using Tevalis with Workforce.com

Frontline managers instinctively know that the best rota for next week isn't always the same one from last week. With Tevalis EPOS connected to Workforce.com, scheduling teams can use real sales data to build rotas that match their forecasted demand.

Thanks to our powerful integration, your Tevalis EPOS system, Workforce platform, and Accounting software are fully connected, giving you time to focus on other business areas. Used by over 10,000 workforces worldwide, on average, operations are gaining up to 80% manager efficiency from shift scheduling activities.

Sync revenue data and adjust for demand.

Pull revenue and itemised sales data from your Tevalis EPOS, then use Workforce.com's demand modifiers to build schedules tailored to SPLH sales per labour hour. Adjust the demand slider, and never worry about being understaffed again.

Build sales-optimised rotas automatically.

Once Tevalis sales data is synced to Workforce.com, it's easy to accurately forecast upcoming demand, and build the best schedule. With the most up to date revenue data, the optimal rota can be built automatically.

Securely developed and maintained in-house.

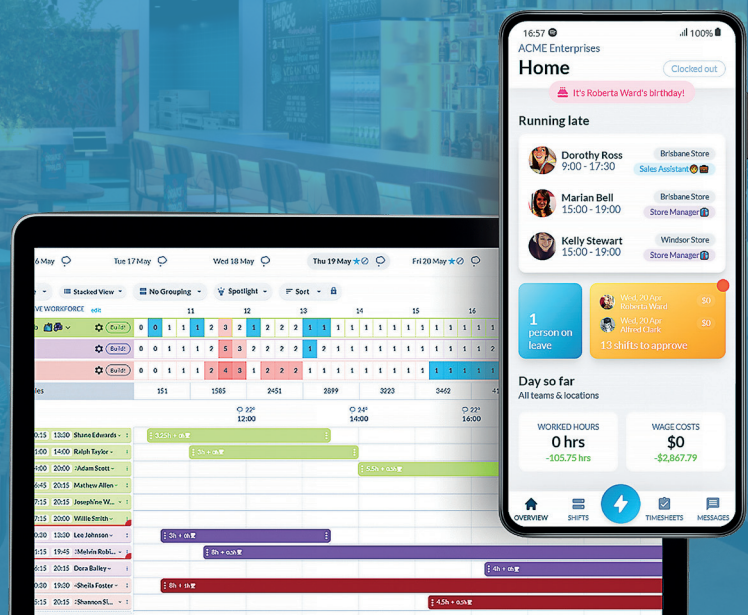

Together, our in-house expert engineers build and maintain our integration, ensuring you have a solution you can trust.

Tamatanga brings the fresh, fragrant taste of India to the streets of the UK across their 3 sites in Birmingham, Nottingham and Leicester. Now, they reap the benefits of a fully connected EPOS and Integrated technology ecosystem, from high-performance EPOS tills and Kitchen Management Screens, to an effective Workforce Management platform with Workforce.com.

“The integration with Tevalis EPOS and Workforce has completely revolutionised our business. By being able to build rotas on demand from sales data from Tevalis, we're much more accurate in our staffing and have seen a significant reduction in our labour costs. Our frontline managers are also making data-driven decisions on a daily basis to make sure we have the most optimal labour costs. The team loves it and our budget has never been better!”
