tevalis

Our Integrated Partners

Your guide to our partners.

The Tevalis Ecosystem is built on innovation and is hugely successful due to the integrations we have with our partners. From Order and Pay services to Reservation bookings, our industry-leading partnerships enhance your business operations.

Updated: September 2024 | Version: 4

Contents Our Tevalis Partners explained.

The Tevalis Ecosystem

We believe in connected technology. With over a decade of experience, we have identified that by integrating systems and providing a fully connected Technology Ecosystem, our customers can receive maximum benefits from their system.

Our suite of hardware and software technology solutions developed in house offer On-Premise and hosted Enterprise solutions to fit the client. We also integrate our system with other experts in their respected fields, providing operators with an industry-leading and comprehensive technology solution. We help to drive a client's business forward through improved service, increased revenues, reduced administration and big data business analysis.

Our Technology Ecosystem reflects three core areas:

● **On-Premise**
The Tevalis On-Premise layer consists of bespoke software, which sits on our high performing touchscreen tills, self-service kiosks, kitchen management systems and the latest in handheld ordering.

● **Enterprise**
Seamlessly integrating with the Tevalis On-Premise solutions, are the cloud-based management applications developed in house. Each module has been designed to push your business forward in both service and in analysis.

● **Integrations**
We always want to make sure that each client receives a consolidated and industry-leading technology system. That's why we integrate with others in their expert fields, from reservation systems to payment services and everything in between.

Payment Services

We integrate our EPOS with the industry's leading payment services. Easy to use, portable Chip and Pin terminals are available as well as fixed units, enhancing the speed of service and accuracy across your business. The transaction data is automatically submitted to the chosen company's card payment software for bank authorisation and verification through this integration.

By combining cutting edge technology, extraordinary customer support and an unconventional way of thinking, our integrations offer lower rates, better service, and peace of mind.

● **Pay at Table**
This revolutionary service allows you to print/split a bill and close off a table directly from the card machine itself.

● **Turn Tables 4x Faster**
An average sale takes over a minute to process. With our integrated solution, this is reduced to 20 seconds, improving speed of service and overall efficiency.

● **No Human Error**
Integrations guarantee that payments are always 100% accurate, so you'll never have to worry about over or undercharging your customers.

● **Cash Up in Minutes**
Reconciliation is fully automated. There's no need to cross-check figures against end of day reports when doing your final settlement.

dojo® clover barclaycard
globalpayments planet adyen Verifone Windcave worldpay FREEDOM.PAY
Dojo –

Get paid, tomorrow.

Our longest standing Card Payments integration. Formerly Paymentsense, we have worked together for over 9 years delivering a ground-breaking integration between the card payments solution and the Tevalis POS. Integrating with the Paymentsense V3 API, we have a cloud integration covering both PAC and PAT. Semi attended (kiosk) is available on the old Paymentsense Model, but this is not supported by Dojo.

The main devices in use are:

- Dojo Go/PAX A920 – For PAC and PAT

- Dojo One/PAX A80 – For PAC only

- Any new devices added to their portfolio do not usually require further development due to the method of integration.

Clover – Ultra-portable and simple devices that enable flexible payments wherever you are.

> Together, Tevalis and Clover have launched an innovative solution that improves efficiency in front-of-house processes, as well as gives operators the tools to ensure exceptional guest experiences.

The Tevalis integration with Clover is relatively new, passing the pilot phase in January 2022. We have, however, been working with them for some time in plotting out the partnership of this solution under their First Data arm (who also supply the original Acquiring service for Paymentsense). Clover is the leading PCI-compliant, EMV-ready solution in the marketplace. Our integration provides innovative systems which give operators even more choice, flexibility and efficiency in serving guests, making ordering and payment even smarter.

Our existing integrations are currently:

- PAC on the Clover Mini

- TevX integration on the Clover Flex (each Clover Flex being implemented requires its own TevX licence). We test each new device for our own due diligence.

Planet Payments – A single payment platform that helps you grow your business.

Simplify payment acceptance and processing, unlock revenue opportunities and grow your business. Discover an all-in-one payments platform which brings together payments acceptance and processing, currency conversion and tax refund solutions into a single terminal, supported by a comprehensive suite of value-added services.Provide frictionless order and payment services to your guests, make efficient savings and build a comprehensive guest profile all while recieving up-todate performance data for further analysis.

Highest Level of Security

Proprietary Planet technology with 3C integration hosted in a P2PE PCI Level 1 infrastructure.

All Major Card Schemes

Aquire all major international card schemes and process for American Express.

Contactless Payments

A single entry point to faster and safer digital contactless payment methods

Digital Wallets

A service that works for Alipay, WeChat Pay, Google Pay and Apple Pay.

Integrating with industry leading Order & Pay solutions.

Smartphone ordering has never been easier. With the development of technology and processes, customers now favour fast and simple ordering methods, and they expect speed, efficiency, and precision at their table. Not only do online order and pay platforms enhance the customer experience, they also bring numerous advantages to businesses, including reduction of operational costs, elimination of queues and ultimately increase in revenue.

Tevalis ensures an industry-leading technology suite with maximum functionality by partnering with the most efficient order and pay companies in the UK, including Mr Yum, me&u, and Qikserve. These integrations provide benefits such as:

- **Speed of service**
  Dramatically increasing speed of service through a streamlined ordering process, customers can take a seat and order in their own time, cutting out time between taking orders and delivering them to the kitchen.

- **Increased revenue**
  Utilising order and pay integrations can increase customer spending by 20-40% whilst creating efficiencies and capturing valuable data. This bolsters your revenue through automated product upsells, targeted promotions based on customer ordering trends, and even room-service capabilities.

- **Improved service quality**
  Leave a positive and lasting impression on your customers by providing them with the convenience of at-table or room ordering. Our integrations ensure an enhanced user experience with an innovative, well-designed graphical user interface.
> "Tap on to magic experiences with me&u, the smarter way to order and pay. We use great technology and rich data to elevate your guests experience.
Me&u's web-based online ordering solution provides operators with a platform to allow their guests to scan a QR code, view the menu and order and pay directly through the app. With powerful data-driven features that were build for hospitality, by hospitality, me&u have assisted operators to drive customer retention, increase their average spend by 30% and maximise upselling opportunities and reduce queues and wait times. The best part? It's all connected to the Tevalis EPOS, meaning your venue will benefit from a seamless table to kitchen order process.

The Tevalis integration allows:

- Posts orders through to the POS to kitchen printer/screen

- Open table & close table

- Split bill

- No menu sync currently – this is being developed and should be set-up before end of Q2

Mr Yum – Create a magical customer experience while growing your sales, data & efficiency with Mr Yum's powerful QR code mobile ordering service.
Mr Yum's web-driven application, allows guests to scan, order and pay from their table as well as order ahead. The solution also offers access to data for marketing use. This partnership began in New Zealand and Australia and since we have seen a growth in customer spend by 20-40% on average, as well as giving operators the ability to capture valuable data and get to know their customers better through personal data.

The Tevalis integration allows:

- Posts orders through to the POS to kitchen printer/screen
- Open table & close table
- Split bill
- Menu sync

Qikserve – A simple order and pay solution that connects the traditional and digital experience.

Qikserve is an order and pay web-based platform that allows clients to deliver an order and pay web solution to customers. Customers can scan a code/NFL (Qikpay), view the menu, pre-order, order at table/counter and pay at table/counter. Qikserve also provides delivery capability.

The Tevalis integration allows:

- Posts orders through to the POS to kitchen printer/screen for collection
- Online orders posted to temporary table in POS
- Open & close table
- Split bill
- Menu sync
- Syncs the app to the POS to update once a table has paid through Qikpay
- Close the table off once the bill has been paid through Qikpay
- Keep tabs open through Qikserve's Open Check feature

Integrating your Tevalis EPOS system with a leading feedback provider brings substantial benefits to the performance of your business. Discover the root causes behind common customer concerns, boost word-of-mouth advertising through higher levels of customer satisfaction, and increase menu margins for better ROI.
Our strategic feedback partners, Yumpingo and FETCHPay, offer comprehensive platforms with features to attract and retain your customers.
This includes:

● **Multi-channel methods to capture customer feedback**
With options such as QR codes, email and SMS, handheld devices, apps, online ordering and booking platforms, and more, you can choose the channel that works best with your venues and customers to easily collect reviews and comments.

● **Online reputation management**
Tailor your feedback flow to offer quick and easy ways for your happy customers to leave online reviews of your business. Whether that's Google, Tripadvisor, or your social media channels, boost your online reputation with seamlessly connected feedback platforms.

● **Customisable areas for collecting feedback**
Are you more concerned about the food quality than the venue atmosphere? These integrations allow you to tailor your customer review process to focus on the areas of your business that you want to improve the most.

Around 90% of consumers research a restaurant before they decide to visit.
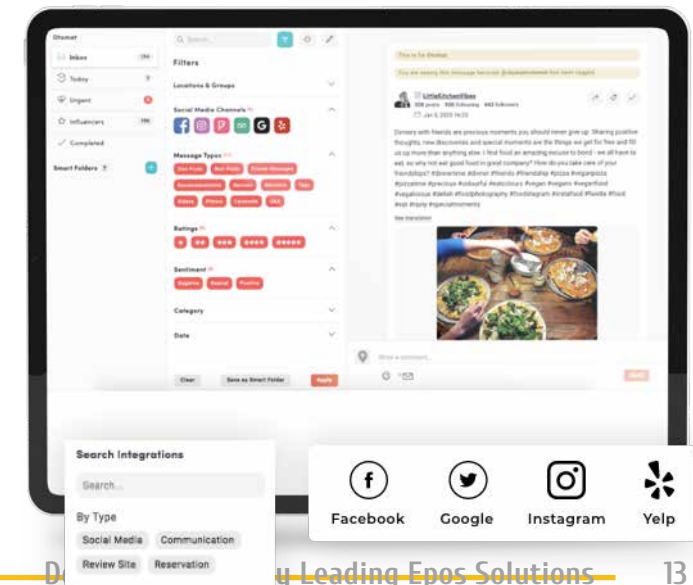

yumpingo®

FETCHpay.

Yumpingo – Capture real time customer feedback

Yumpingo is the next-generation experience management platform that transforms real-time customer satisfaction data into actionable insights, quantifying how well hospitality teams are executing against customer expectations and defining the path to serving more happy guests. Yumpingo gives voice to the silent majority of customers and pinpoints what matters most to them and, more importantly, why. Yumpingo has multiple ways of ingesting the customer data, ranging from on-premises bill devices, QR codes directing them to a survey, Order & Pay integrations and post-dine emails.

The tevalis integration provides the client with the ability to see basket level data and items associated with feedback generated.

- Collect real-time customer satisfaction
- Improve quality of service and menu item execution
- Drive brand innovation and performance
- Retain and recover guests in-the-moment
Workforce Management

Save time and streamline your staff management process.

Planning rotas by hand, needing last minute changes or revisions, and manually checking employee attendances all decrease efficiency and overall accuracy for management. Tevalis integrate with the market leaders in Staff Management solutions to simplify and expedite these essential processes.

- **Payroll & Cost**
  Manage and track your staff costs compared to revenue, ensuring accurate payroll and insight into managing your budget.

- **HR & Absence**
  Effortlessly track holidays, annual leave, unpaid time off, sickness and more, with secure storage and easy access to contact details.

- **Time Clocking & Reporting**
  Monitor your employees' hours, attendance, and absences with intuitive and accurate reporting. Staff can also clock in and clock out through our leading partner integrations.

- **Team Communication and Scheduling**
  Provide easily accessible staff schedules, with simple ways to enable shift swaps and time-tracking between teams.

Planday   rotaready®   harri   Fourth

workforce.com   S4labour   goRoster

Planday – Smart scheduling and rota software for the hospitality industry.

Planday
FROM XERO

"Your Powerful Scheduling & Staff Management Suite".

Planday is our key strategic partner for workforce management. It allows staff to log in and out through the staff app (within a certain radius), request shift amendments/swaps or additional shifts, push HR documentation through to individual staff members and plan rotas. On the management system, Planday tracks sales and revenue to give a better insight into rota scheduling as well as showing a client their staffing costs vs sales taking.

- **Accurate Sales Data**
  Send back sales data (from partner request) daily to the Planday platform.

- **Consolidate Your Reports**
  Send back time and attendance data to the Planday platform.

- **For Any Size Business**
  Planday's intuitive and easy-to-use platform is scalable and flexible, whether you run a small company or a multi-site enterprise.

- **Compliance**
  Configure your Planday system to align with policies or rules in place at your business, with features such as automatic compliance warnings.

Workforce.com – Build better rotas using accurate sales data.

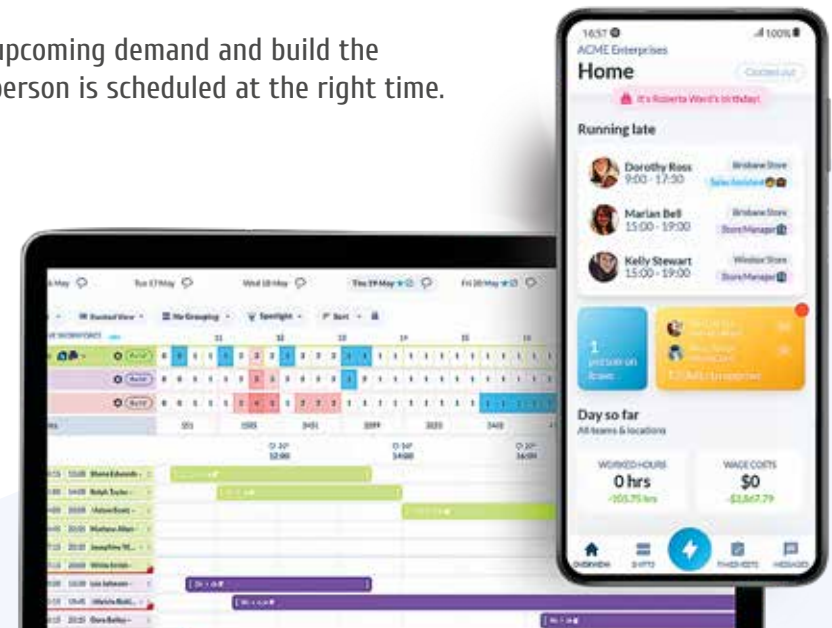

Simplify employee scheduling, optimise labour costs across locations, and help managers make the right decisions with Tevalis and Workforce.com.

With Workforce.com, revenue and shift data from previous weeks are used to accurately forecast upcoming demand and build the best rota optimised for hourly rates, staff qualifications, and availability, ensuring that the right person is scheduled at the right time.

The Tevalis integration allows:

- Manage your budget and forecast future staffings needs by comparing Tevalis revenue data with labour costs.

- Reduce labour costs, optimise your operations and increase profitability.

- Predict future sales from the Tevalis POS.

Delivery

Integrated online order management for simplified deliveries.

Online delivery services are a favoured purchase method: they provide quick and easy food options for customers whilst providing businesses with additional revenue streams. With the increased number of delivery services available, integrating your EPOS system with one of Tevalis' partners will simplify online orders for your teams and improve the overall customer experience.

- **Stay ahead of the competition**
  Offering quick and easy delivery options brings in additional revenue whilst keeping your business up to date with hospitality market trends.

- **Customer retention**
  Ensuring your delivery services are accurate and swift will enhance your customers' experience meaning they'll order from you again and again.

- **Track orders**
  Track all your online orders for additional customer data and transaction insights.

- **Save time**
  Simple-to-use platforms make processes fast for your teams so they can focus their time on more important areas.
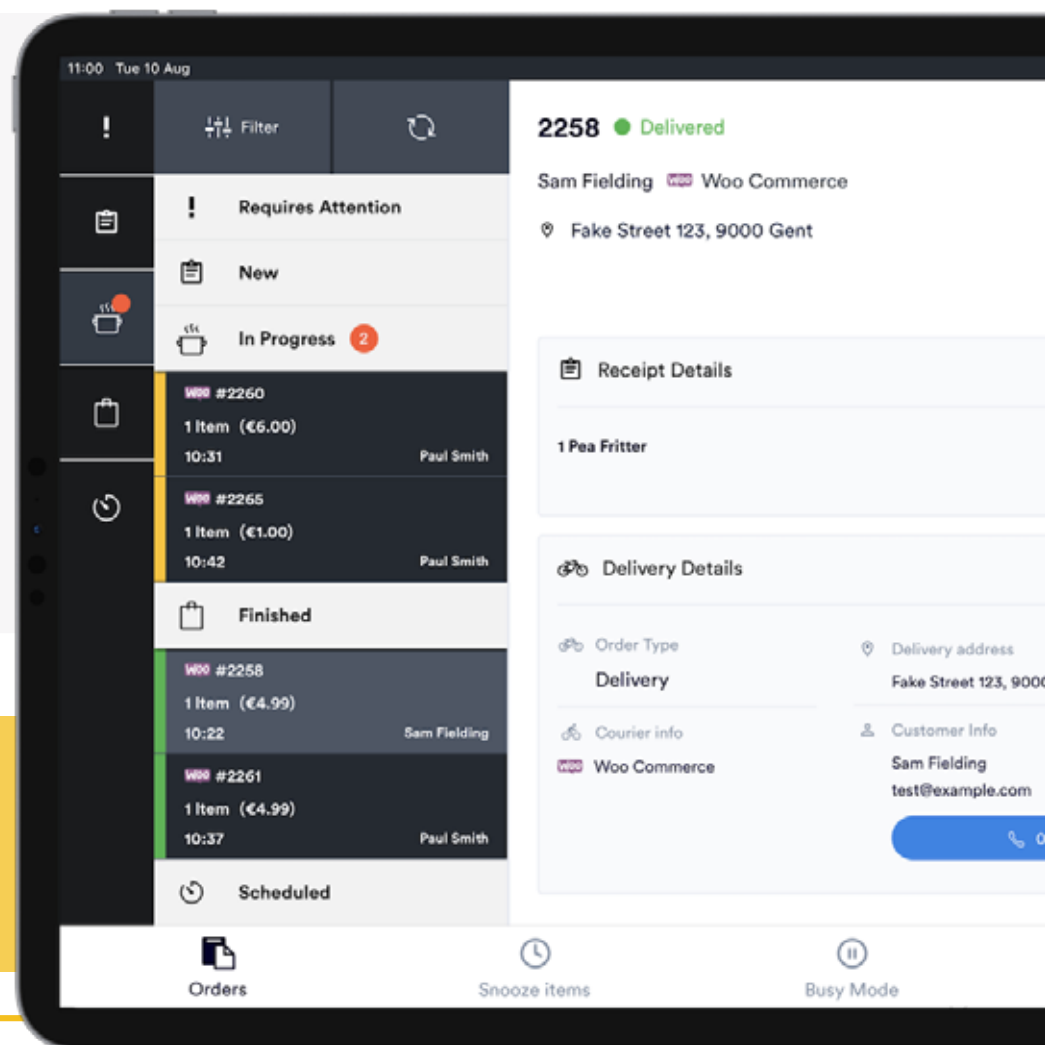

# Deliverect – Simplify your online order management and improve your business' operational flow.

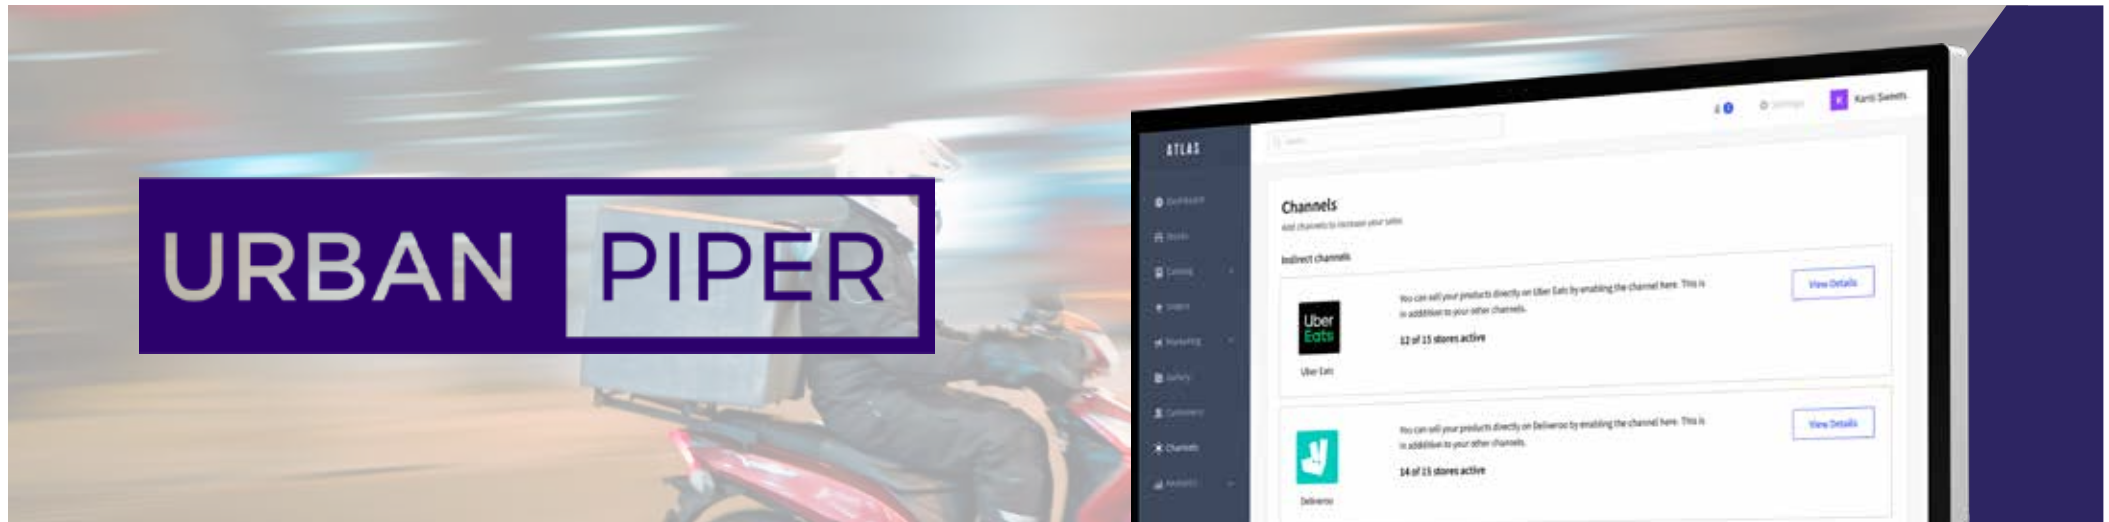

Deliverect is our key strategic partner in the online order for delivery space. Deliverect provides a centrally managed system to hold all the client's delivery platforms, allowing focus on one system for delivery orders instead of multiple. The system shows all the customer details for the order as well as what platform they have ordered through. Deliverect then enables accurate reporting on each delivery platform's performance and revenue for the client.

● One singular online orders integration into the POS

● Orders push directly to kitchen screens/printers

● Orders hit online temporary tables in the POS

● Integration extends to online commerce, kiosks, and order and pay solutions
Urban Piper –

Manage your food and delivery channels on one centralised dashboard.

Urban Piper allows the operator to manage all online orders on one screen, streamlining your order flow, reducing missed orders and eliminating errors by managing all your online orders in one place. Controlling your delivery menu across all platforms has never been easier, saving you time and improving labour efficiency at your venue.

Make key decisions based on actionable business data; Thanks to our powerful integration, data is seamlessly synced across Urban Piper and Tevalis, keeping you informed of operational and sales data so you can get a 360-degree analysis of your business and focus on what matters the most.

- One singular online orders integration into the POS
- Orders push directly to kitchen screens/printers
- Orders hit online temporary tables in the POS
- Integration extends to online commerce, kiosks, and order and pay solutions
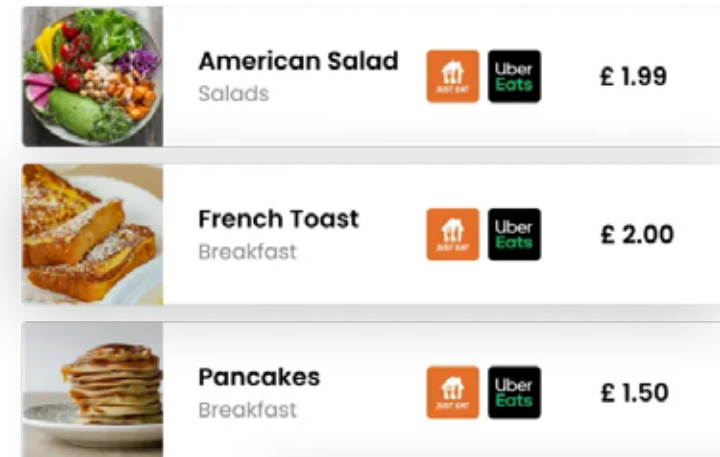

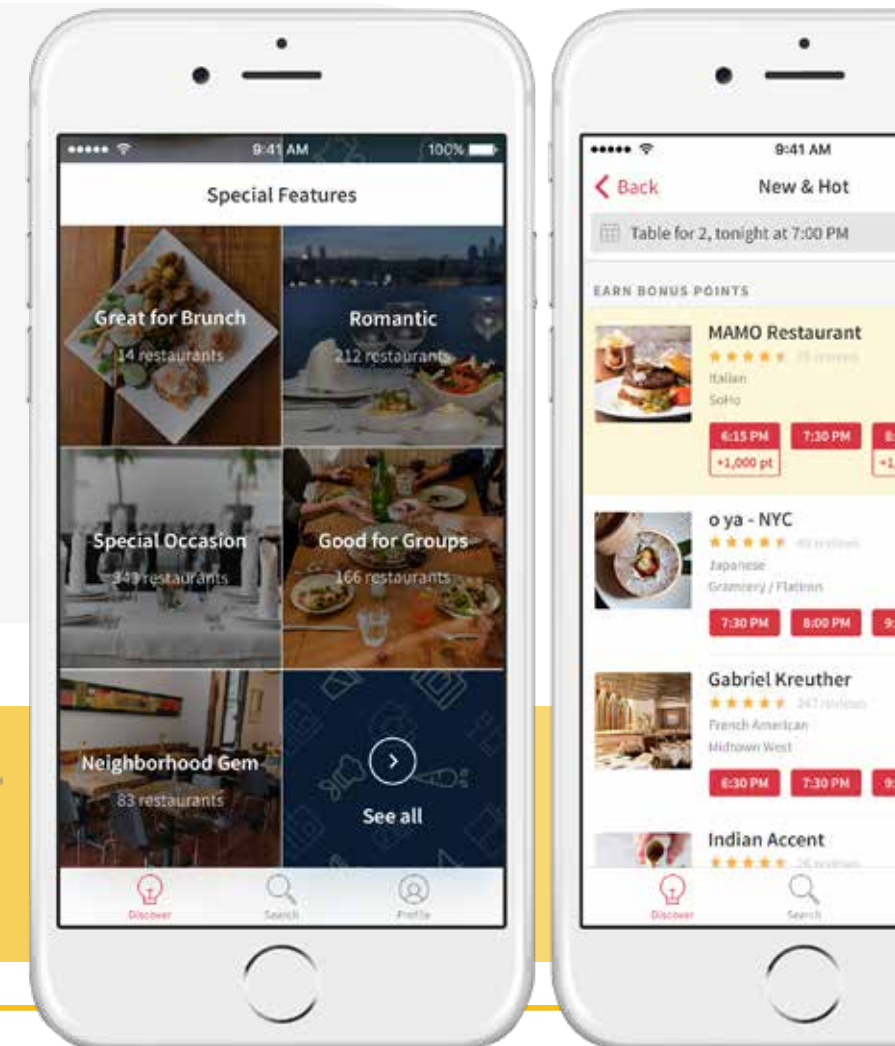

Pre-booking tables have become a key part of a customer's experience with a business, and it's essential to ensure that this initial step in their journey with you is seamless. With Tevalis' reservations partners you can enable customers to check availability at your venue, reserve tables, pre-pay for their visit, even pre-order before they visit, and more. Integrating with intuitive software also provides management with additional data for effective business decision-making.

Simplified operations
Take the complexity out of reservations and save time with automated processes that notify your teams of upcoming bookings or cancellations.

Enhance the customer experience
Customers can quickly and easily check table availability at your venue and proceed to make a reservation.

Enquiry management tools
Comprehensive reservation software manages all inbound and outbound enquiries through one system.

Increase revenue
Implementing a reservation management system is proven to reduce no-shows through booking reminders and pre-visit deposits.
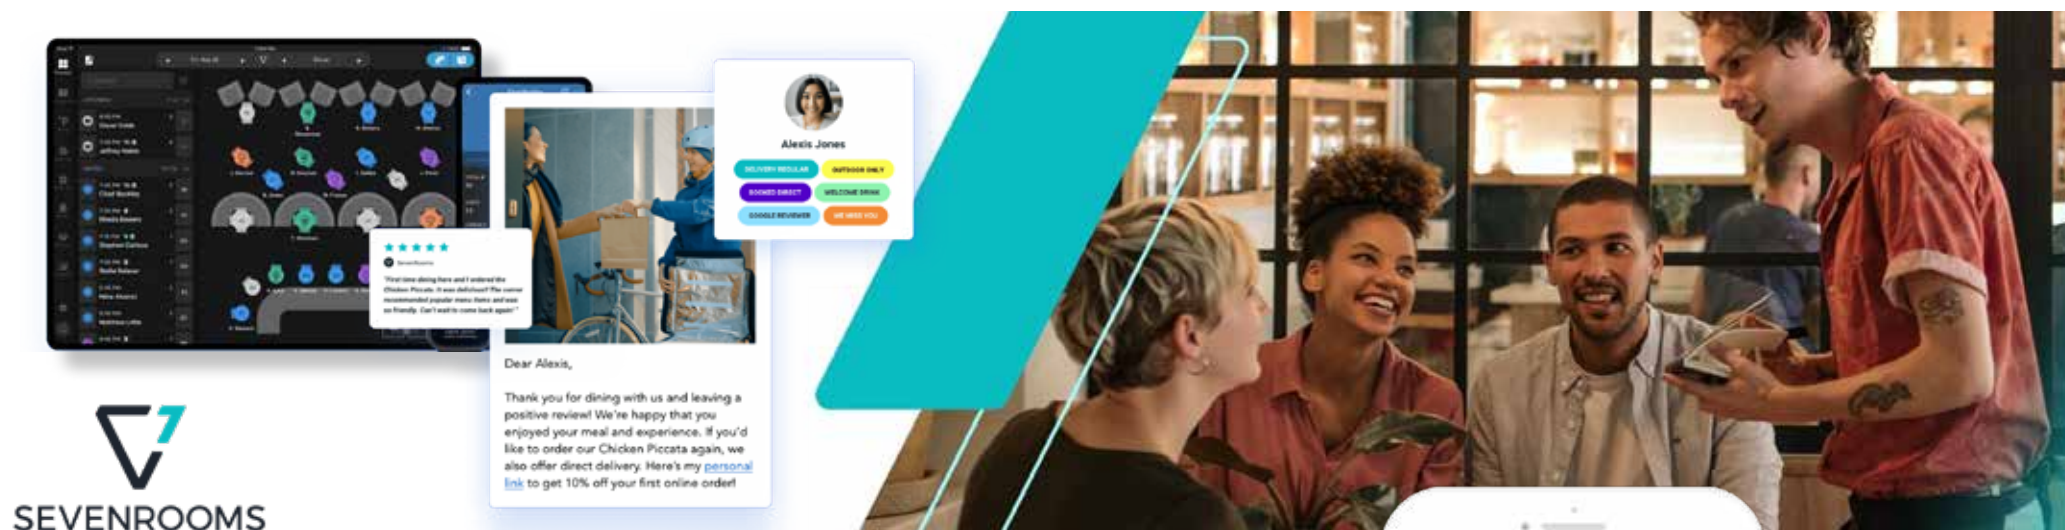

SEVENROOMS   ResDiary   designmynight   OpenTable

QJUMPERS   RESY   NEXUDUS   NOWBOOKIT

Sevenrooms – A reservation space that put you in control of your brand & data.

Sevenrooms is our strategic partner in the reservation space. Their platform allows a client to host table reservation capabilities on their website or through external online booking platforms.

The Tevalis integration is bi-directional, providing the following capabilities:

- Hold deposits/pre-payments against the reservation table in the POS which will credit on the final bill
- Send back status updates to the reservation system, when the table closes it allows the table to be reserved again on the online platforms.
- Move or merge tables requests which can be accepted or rejected based on table availability.
- Send basket level data back to Sevenrooms which a client can use for promotion offers.
Loyalty & CRM
From personalised offers to targeted promotions, integrate with our Loyalty partners.

Increase the likelihood of repeat business through tailored loyalty platforms and a direct line of communication with your customers. Many people enjoy being rewarded for spending time and money at places they love so send offers and discounts on their favourite products to keep them coming back to your venue.
Tevalis integrates with industry-leading CRM and Loyalty platform providers ensuring flexible and powerful customer engagement.

- **Learn consumer habits**
  Easily view and analyse customer data to send personalised offers based on their transaction history and favourite purchases.

- **Configure to your requirements**
  Whether you need a branded app, a points collection system, or personalised promotions, we can configure our integrations to the needs of your business.

- **Enhance your customers' experience**
  Provide convenient payment systems, enticing offers, or rewards for loyalty that will streamline your customers' journey and encourage future visits.

- **Multichannel loyalty**
  Every business has different methods of managing customer loyalty: boost your customer relationships through your website, custom apps, or on-premises solutions.

THE LOYALTY CO.

Como –

Offer a personalized & seamless experince with Como.

Get to the heart of your customers
In-store and online.

Como is our key strategic partner in the Loyalty and CRM space. Como provides clients with customer-facing app (including loyalty card or apple/android supported card) that allows customers to receive offers and promotions as well as gain loyalty points to redeem in store. The AI tool within Como allows a client to see analytical data on customer visit and spend trends, enabling the client to push out effective marketing and promotional offers to their customer base to increase spend.
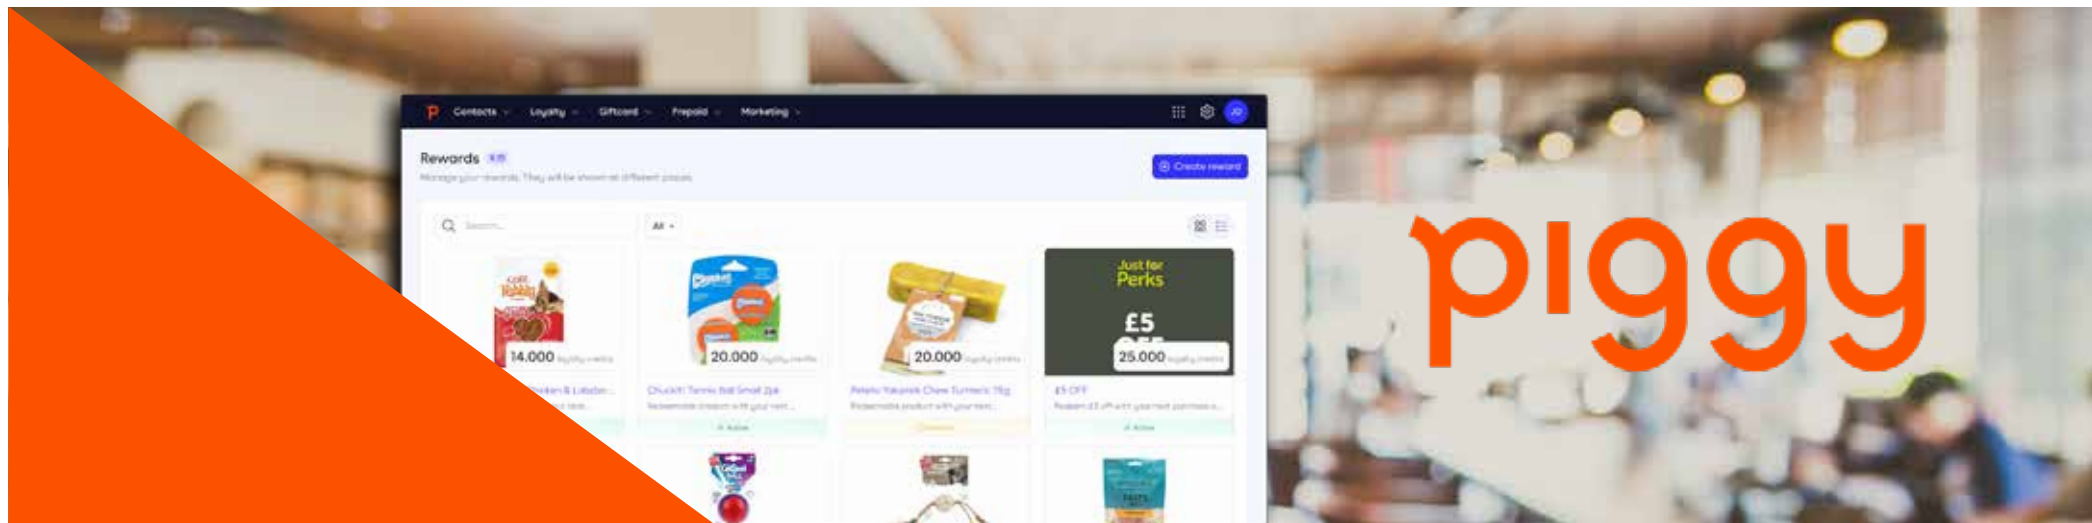

The Tevalis integration allows:

- Pull member details to redeem offers/promotions/points linked to customer accounts

- Send member and non-member data back to the Como platform

- Register members through the POS

" The ability to know your customers, learn their consuming habits, and then perform actions based on that helps our company to generate more revenue. "
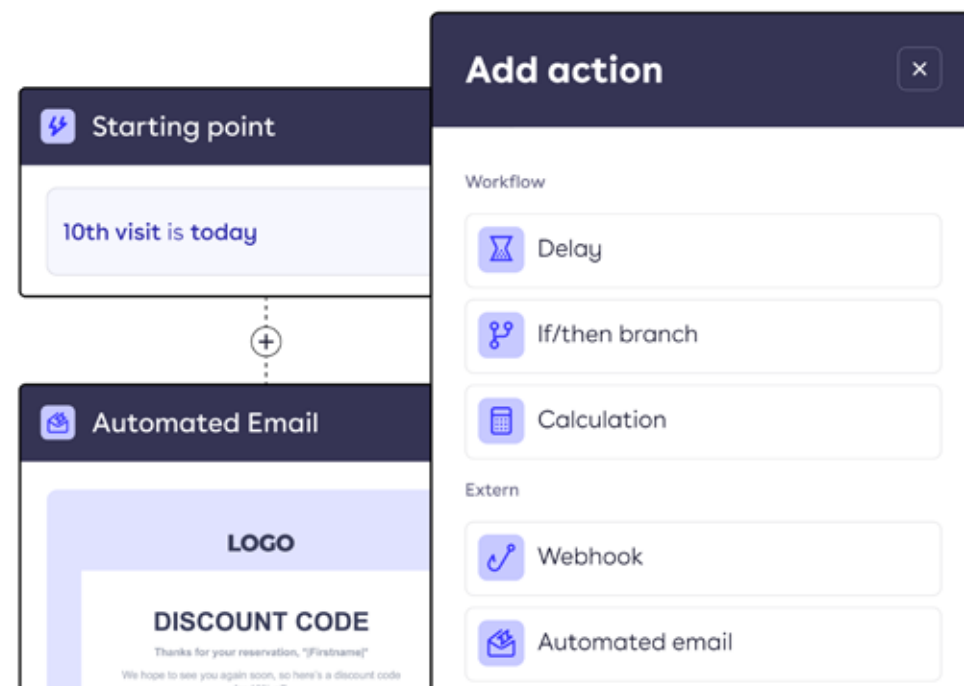

Piggy – Collect customer data, and deliver powerful marketing messages.

Generate repeat business from one easy dashboard. Build everything from powerful loyalty programs to gift cards and marketing automation, including gamification and status levels, giving you the tools you need to drive repeat visits.

Piggy and Tevalis are working together to provide operators with an effective loyalty and POS solution that is fully connected. Data is seamlessly updated, and key performance data can be analysed to help you make better decisions and keep customers flowing!

- Over 100 features to create a lasting bond with your customers.

- Choose your own rewards, rules, triggers, gamifications, campaigns and much more.

- Automate your marketing and retention campaigns, send our digital vouchers and personalised offers to stay top-of-mind.
Gift Cards & Vouchers

Cost-effective and seamless integrations for increased revenues.

Offering loyal customers more options to interact with your business is easy and effective with our industry-leading partners. Gift cards and vouchers bring additional revenue whilst providing your customers with a positive reminder of your brand and the potential to bring in new customers through word-of-mouth recommendations.

Our partners are well-known for their modern and innovative platforms that give you and your teams the power to offer branded gift cards without complex processes.

- **Customisable gift cards and vouchers**
  Designed to sell, our partners allow the personalisation of gift cards and vouchers, showing off your brand whilst bringing in increased revenue.

- **Analytics and reporting**
  Get more insight into your business with purchase analytics and finance reporting.

- **Multiple formats**
  Different customers have different gift card preferences: our integrations allow online vouchers, email gift cards, and physical gift cards.

- **Print and fulfilment**
  Let our integrated partners handle the printing and posting, saving you time and money.

Vouchable · Giftpro · Retailit · piggy · toggle

Giftpro – Grow your business with the eCommerce platform designed for hospitality brands.

Did you know that 44% of customers are more likely to return to their favourite venues if they have a gift card?

As our strategic gift card partner, the Tevalis and Giftpro integration is a lucrative platform for building bespoke digital experiences for our clients and their customers.

The advantages to this integration include:

- Zero upfront costs

- Lowest transaction fee costs through the in-house online payments system

- Better, more bespoke looking store

- Full control over physical gifting

- Support for everything from plastic gift cards to paper and wallets

- Help with design with the option for non-standardised offerings

Property Management Systems

Delivering a unique and intuitive restaurant and accommodation management solution, Tevalis partner with a variety of key PMS platforms to offer connected technology specifically tailored to Hotels, BnB's, Inns and Guesthouses. Accommodation providers are able to access a unified view of all guest transactions across their restaurant, bar and accommodation business. Overall, increasing transparency into their business sales in a consolidated manner. With a Tevalis and PMS integration active, the management of your systems is entirely connected which includes all simple room look ups directly from the Tevalis point of sale. Easy!

hop caterbook eviivo Guestline SIHOT. hotel management software

Opera protel welcome SYSTEMS avondata apaleo

clock PMS+ MEWS StayNTouch Hotel Perfect A Mews company

# Hop – A cloud-based platform that enables management of properties, teams, and daily operations.

Manage all your operations in one place with hop.

Hop is a property management system used within the hotel industry to manage reservations, bookings, and communications to customers during and after their stay at the hotel. It efficiently integrates with online booking platforms as well as provides customers with offers and promotions.

The Tevalis integration with Hop enables client actions such as posting a transaction to a room so a customer can settle their bill at the end of their stay, and sending the day's revenue back to the PMS system for reporting and analytics.

" Hop was created by hoteliers for hoteliers. Everything has been developed with you, your team, and your customers in mind. "
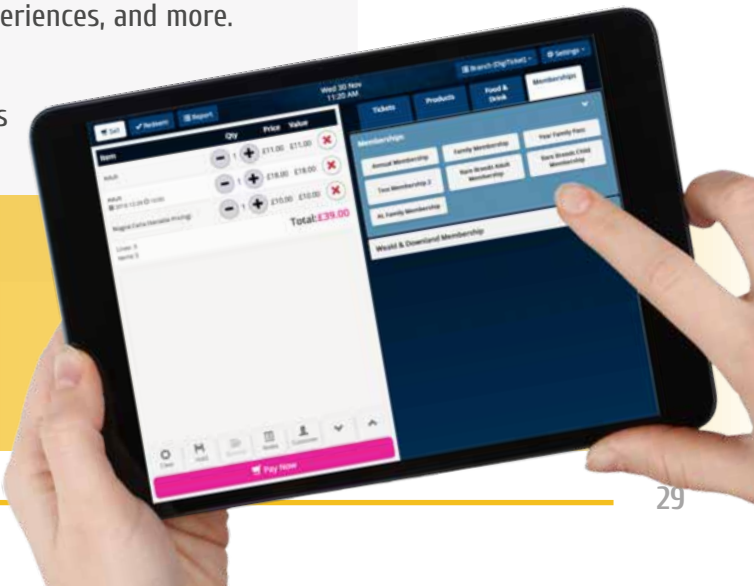

Ticketing CRM
Engage with your guests before, during, and after their visit.

Does your venue require a capable and reliable ticketing system? We partner with industry-leading ticketing management providers to streamline admissions and administration through intuitive software.

- **Increased revenue**
  Quick and easy ticketing will turn first-time attendees into repeat customers, increasing revenue streams.

- **Complete control of your events**
  Utilise tools for any type of admission, including general and timed admission, flexible packages, virtual experiences, and more.

- **Track guest spending**
  Integrated with your EPOS system, your chosen ticketing platform can track food and beverage transactions alongside ticket sales and admissions.

SPEKTRIX   tessitura NETWORK   digitickets   Gateway TICKETING SYSTEMS UK
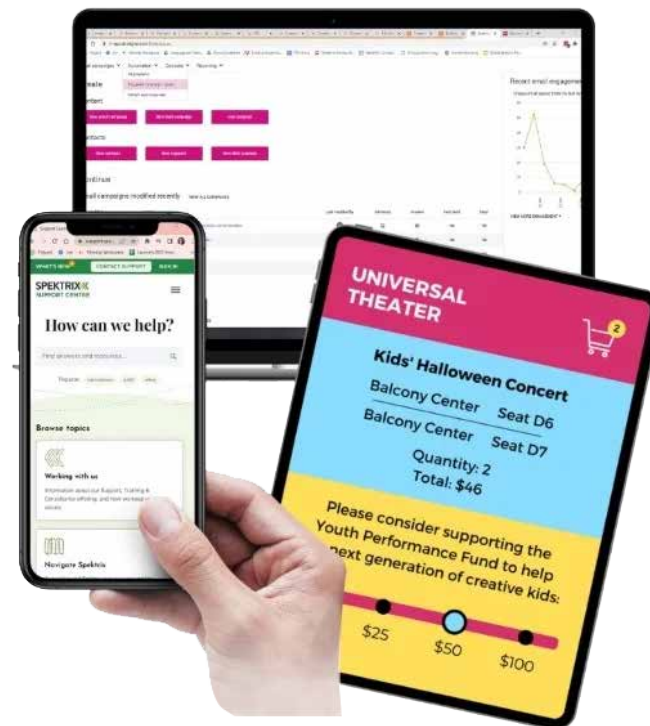

Spektrix – A complete ticketing CRM system with sophisticated tools to streamline your sales.

Build a better experience for your audiences, box office and front of house teams, with powerful software designed and built for theatres and arts organisations. Set up events, subscriptions and offers in minutes; streamline sales at the counter and online; and keep control of ticket inventory with configurable seating plans, delivery methods, payments and fees.

Inbuilt queuing and waiting list tools help you manage your busiest onsales, while gift vouchers, account credit, automated offers, exchanges and account notes make it easy to track customer needs and support every enquiry.

● **Streamline setup of events, inventory and incentives**
Build events, price lists, ticket types and subscriptions in minutes; automate offers, promotions and upsells; and monitor progress with scheduled reports for your management, promoters and team.

● **Smooth transactions, online and at the counter**
Empower your box office team with a smooth, intuitive sales process. Customer notes, data prompts and upsells all appear on a single sales screen, guiding staff through every step

● **Instant insights into sales, pricing and team performance**
A full suite of inbuilt reports equip Box Office managers to plan staffing around peak demand, review individual performance, and identify training needs.

Sales/Stock Data Exports Driven by technology.

Tevalis' industry-leading integrations are designed to pull the FnB-driven EPOS data into platforms for accurate external management. Take control of your inventory and purchasing through intuitive software that makes accessing operational data easy. Data analysis and aggregated data reporting tools, stock depletion from external inventory platforms, as well as API access to your data, ensure management makes the right decisions for your business and consistently reaches profitability and service targets.

● **Minimise waste and increase revenue**
Easily track all stock and inventories with features such as live inventory movement, usage, real-time sales, and more.

● **Crosscheck sales and stock costs**
Compare pricing with suppliers' agreed lists, meaning your orders stay within your budget.

● **Sales forecasts**
Reduce food waste, understaffing, overstaffing, and over-ordering with full accountability across your inventory.

● **Menu engineering**
Create recipes and menus whilst keeping in line with your budget: plan pricing, portion size, and costs.

Integrating with expert partners in accountancy means your financial processes require less admin whilst providing in-depth data and analysis tools. Transactional and operational data from Tevalis, and invoicing and purchase orders from our Stock Management platform, can be directly posted to your accountancy application, increasing the overall efficiency of your finance team. Key features such as easy time tracking, cashing up reporting, and automated invoice management are available from our various partners.

Cash up online
Integrating seamlessly with your EPOS system, the cashing up process will be easy with daily variances and reporting considered.

Alerts and reminders
Set up automatic reminders for invoices or alerts for overdue payments through accounting platforms.

Automate payroll
Securely pay your employees with automated tax, pay, and pension calculations through HMRC-recognised payroll platforms.

Cashflow insights
Get in-depth reports on the money coming in and going out of business, with easy-to-view dashboards and data analysis.

Opsyte –

Management tools made for hospitality to run your business the right way.

Opsyte has a fully supported online rota system, allowing your staff and management full access and control over their shifts. Automate your rota by using templating and shift swapping, removing the manual entry from rota creation. Plan rotas, manage working patterns and monitor time & attendance with a free app for your staff. Tevalis and Opsyte are teaming up to simplify your end of night cashing up process, and minimise wasted time. The Tevalis EPOS system is seamlessly integrated to Opsyte, meaning operators can organise and analyse up-to-date daily trade data with Opsyte's simple and effective Cash Up solution, as well as seamlessly stream information to Xero's accounting platform.

- **Finance, cashing up and reporting**
  Tevalis integrated daily controls and reports at your fingertips.

- **Workforce Management**
  Powerful scheduling and HR solutions.

- **Purchase control**
  Automate your invoice management with fully automated tools.

Tevalis integrates with leading gaming and entertainment CRMs to innovate the way people interact and engage with gaming experiences. Compliant with Gambling regulations, these platforms provide a smooth customer experience across various devices and games.

● **Any gaming experiences**
Whether you're a casino, a sports bar, a bingo operator, or social gaming venue, this integration enhances your customers' experience whilst streamlining your operations.

● **Cross-platform management system**
Operators have the tools to increase player loyalty and cross-selling opportunities through innovative software.

● **Omni-channel platform**
A complete solution to providing a seamless player experience across any device or channel.

**IntelligentGaming**
a Playtech company

Sustainability
Offset the environmental impact of your operations.

Climate change is a hugely critical ongoing issue: "the food sector accounts for around 30% of the world's total energy consumption and for around 22% of total greenhouse gas emissions," according to the UN.

Help reduce your venue's and business' carbon footprint by integrating your Tevalis hospitality landscape with an industry-leading sustainability platform. These companies provide various ways to offset or lessen the impact of your operations on the environment, for example, by enabling your customers to plant life-changing trees with their bills.

● Establish a GiftTree Forest in your restaurant's name

● Get paid to offset the environmental impact of your meals

● Your customers have the option to plant a GiftTree with their bill

● Fully automated and integrated with your Tevalis Ecosystem

● Help provide work and food in developing nations

● Receive free marketing materials to showcase your CSR efforts

● A zero-cost way to demonstrate your social and environmental purpose

● Contribute to our efforts of planting 1 billion trees by 2030

GiftTrees

Featured Clients

Proud of the dedication we have to our clients.

At Tevalis, we pride ourselves on dedication and commitment to all our clients, whether you're a group chain of casual dining restaurants or an independent bar. We believe in working with all our clients in true partnership and are very proud of the fact that regardless of whether the business is a global brand, small enterprise or an individual person, we always provide a professional and committed service, satisfying the varying requirements and budgets of all customers.
