Connect your Card Machines to your Tevalis EPOS.

Our powerful integration with Barclaycard means operators can benefit from a smooth, effective payment solution with easy to use, flexible payments devcies that your staff can use around the venue as well as in-depth reporting, giving operators key performance data to make better decisions for their business.

Enhanced Customer Experience

Delivering an intuitive, frictionless and secure payment experience, transforming one-off visits to repeat purchases.

Automated Offers

Drive greater loyalty with the ability to create and automate tailored offers to your customers.

Fraud Protection

Help keep your business safe with award-winning fraud services and payment security experts at your side.

Pay at Counter

The terminal is connected to the POS. When a transaction is tendered as card on the POS, it automatically flows to the card machine, reducing errors and speeding up the transaction.

Opening in 1963, Colchester Zoo has grown over the years and now includes 24 food and drink catering locations as well as five retail outlets across a 60-acre site. They recognised they needed an EPOS upgrade, and with our help, they now benefit from 15 self-service kiosks in their two main restaurants, alongside multiple EPOS units at each venue. Together, we have built a new digital landscape across the business, including best of breed integrations with Barclaycard, Sage and Gateway Ticketing Systems. Helping to streamline their service and increase guest satisfaction, whilst providing management key tools that will give greater visibility across revenues, profits and margins.

“Our Tevalis EPOS is integrated with Barclaycard card terminals, allowing us to effortlessly take payments for orders. Having a fully integrated payment solution ensures that our customers’ experience is seamless, our service is not interrupted by downtime, and we do not experience lost revenue. The integration between Tevalis and Barclaycard is very beneficial to our business as it is fast, reliable, and efficient.”
